[What To Do When You Forgot Local Windows 10 Login Password](#)

Locksmith Wizard [X]

Select New Password 

You must select the account for which you want to change the password and you must enter a new password for the account.

Select the account, and then enter the new password. The account password is going to be reset and the account enabled.

If you have a local policy on the system that enforces password length or complexity, the new password must comply with this policy.
